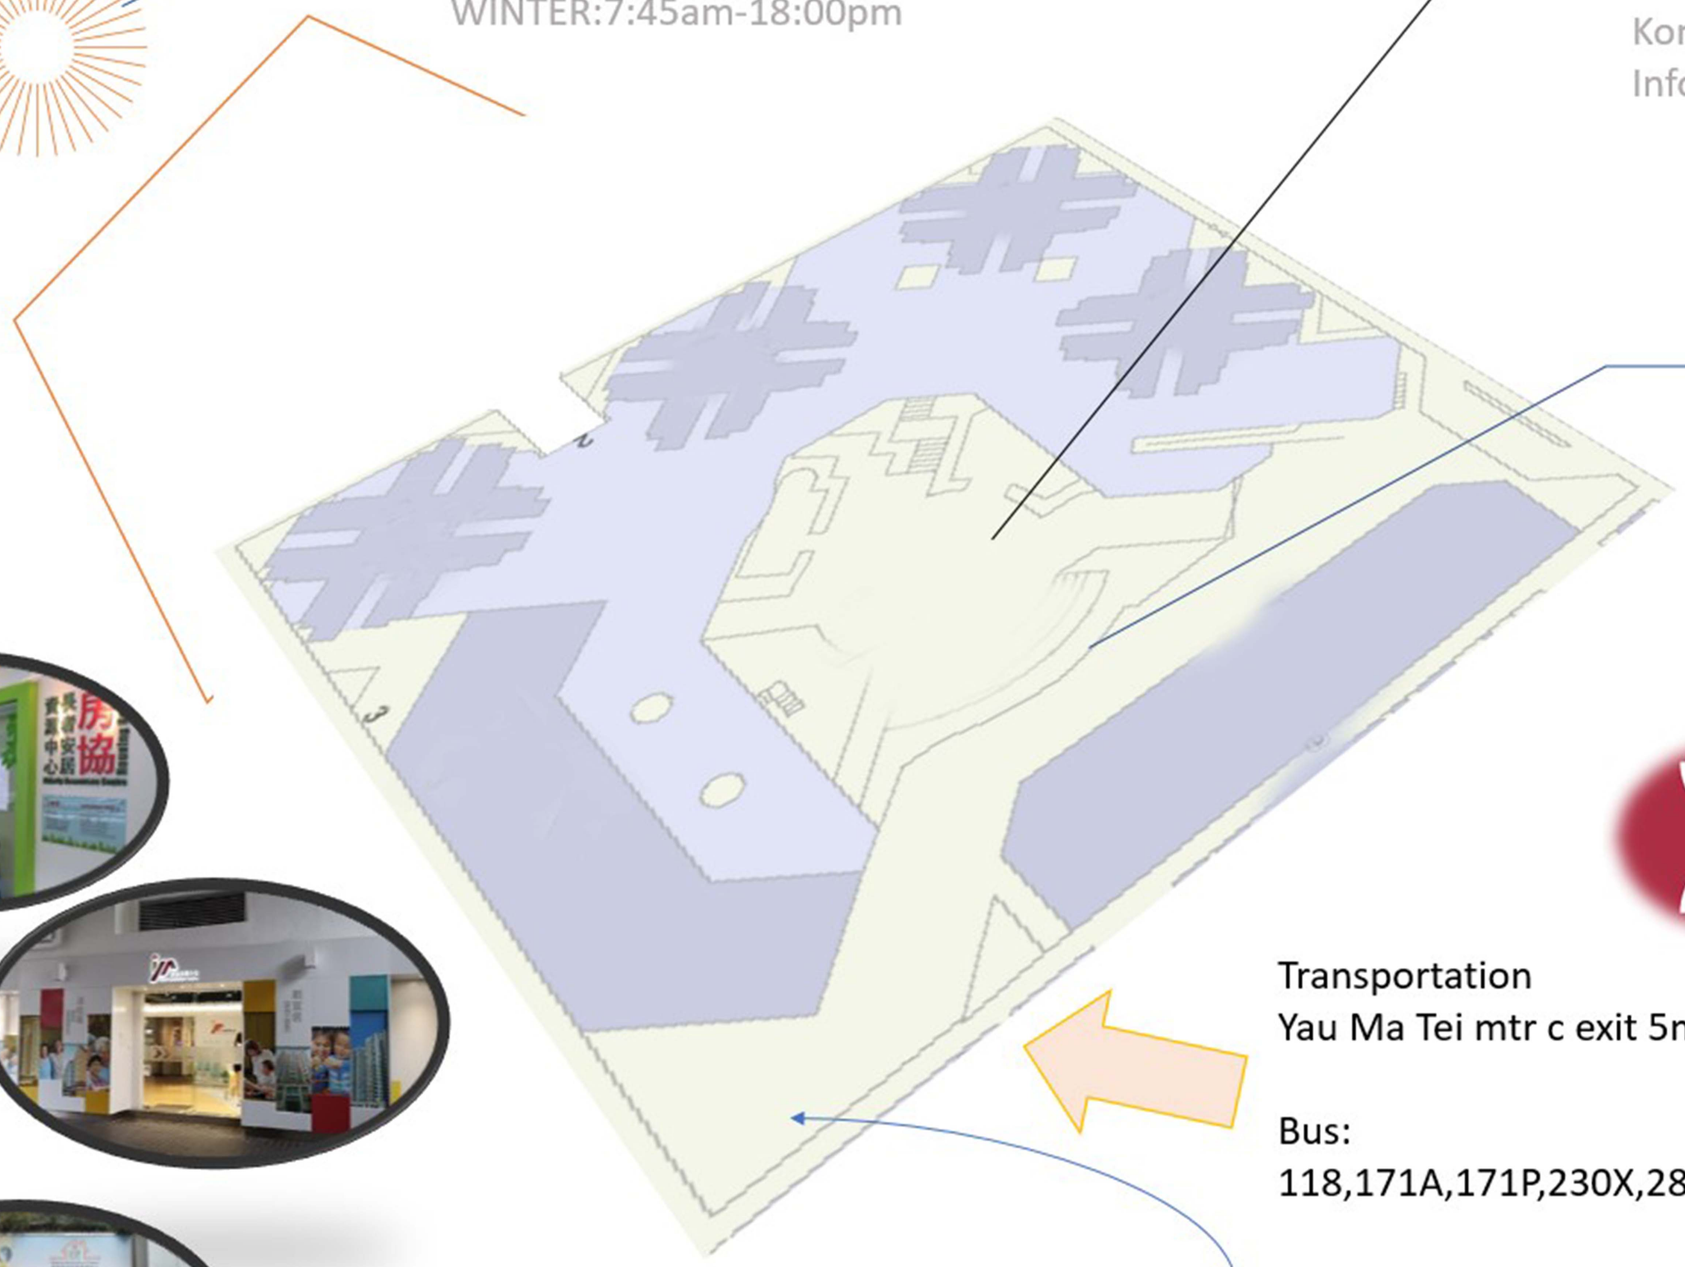
Design: Space, Design, Atmosphere_Honey climb

SUN PATH
SUMMER: 5:30am-19:30pm
WINTER:7:45am-18:00pm

Design goals
FLOOR AREA :5000 ft²
SITE INformation:Hong Kong Geographical Information Office



Crowd time
7:00am-1:00pm
4:00pm-6:00pm

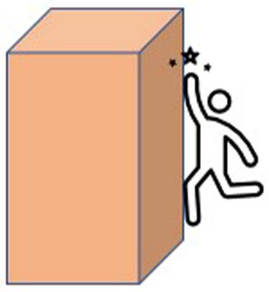
Transportation
Yau Ma Tei mtr c exit 5mins walk

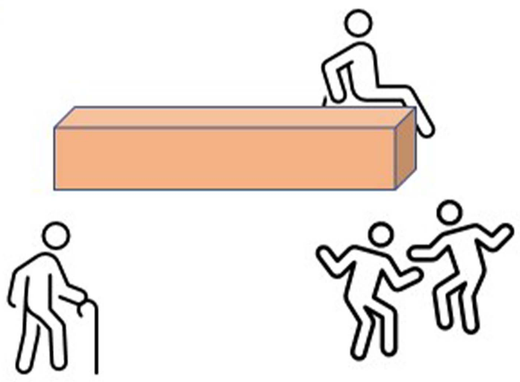
Bus:
118,171A,171P,230X,281A,3X

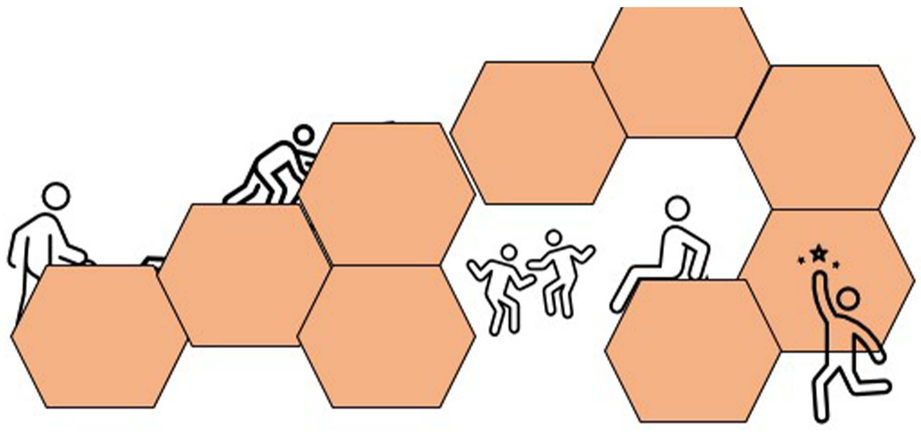
Nearby facilities
kindergarten, kindergarten, day care center for the elderly, youth center, development center for the mentally handicapped, mini theater

PREVAILING WIND

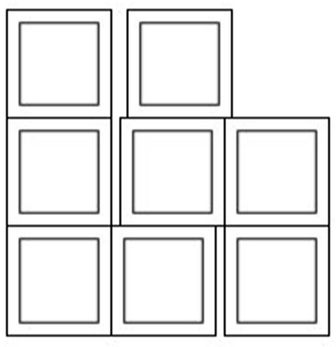
Conceptual diagram



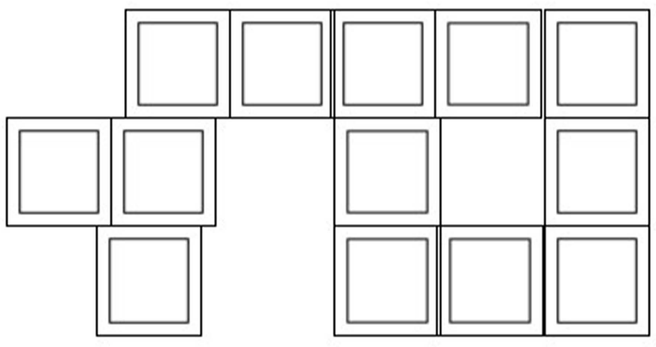




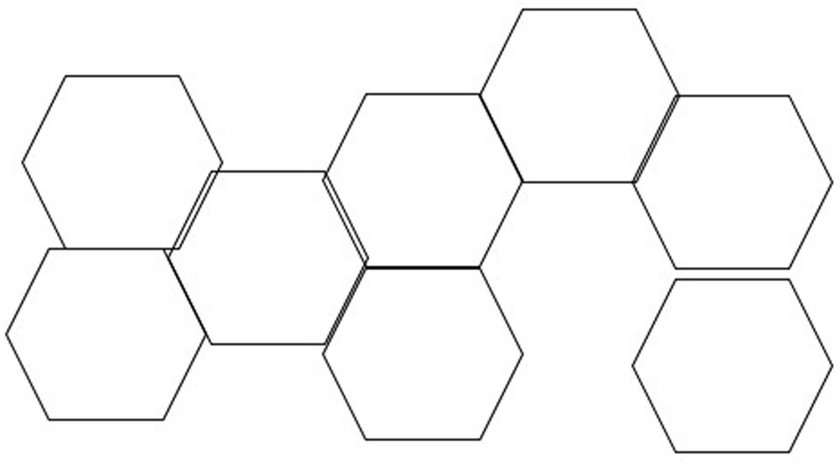
Design process



A vertically overlapping climbing frame can crawl, traverse and play, and support training



Add space to rest and change shape



The hexagon is a stable form, and its edges can be perfectly overlapped. According to the honeycomb research of Kashima Construction Co., Ltd., the hexagon can effectively reduce vibration and reduce the cost structure to ensure the seismic safety of the footing, such as the Mexico-Honeycomb Building. (Hex Towers)
